

Classroom Assignment : Automating Alert Interactions

Learning Objective:

Learn to automate alert interactions using Selenium WebDriver.

Expected Completion Time:

Best Case: 15 minutes

Average Case: 20 minutes

Assignment Details:

Automate the Leafground webpage to interact with a prompt dialog and perform actions using Selenium WebDriver.

Precondition:

- Initialize ChromeDriver
- Load the URL (<https://www.leafground.com/alert.xhtml>)
- Maximize the browser window
- Add an implicit wait to ensure the webpage elements are fully loaded

Assignment Requirements:

- Click on the "Prompt Box" button to trigger the alert.
- Switch to the alert and type a message in the alert box.
- Dismiss the alert.
- Retrieve the typed text from the alert and verify it.

Hints to Solve:

- Use Selenium methods such as `findElement()`, `click()`, `switchTo().alert()`, and `sendKeys()` and `alert.getText()` to perform the required actions.
- Use appropriate method of Alert interface to dismiss the alert.
- Use conditional statements to verify the text entered in the alert.
